

FAQ's

The Tiny

Q - What do the specifications mean in simple terms?

A - The meter has a 100 amp capacity, and is designed for a 230 volt single phase system.

Q - Are they suitable for billing?

A - Yes its an Ofgem/MID approved product—Ofgem Approval No 986.

Q - Can the meter be read remotely?

A - Yes there is a pulsed output version—used in both automatic meter reading systems and building management systems.

Q - Can they buses used for Renewable Energy Applications

A - Yes no problem whatsoever. They are suitable for wind turbines/PV panels and heat pumps.

Q - Have you import/export meters?

A - Yes we have an import/export version—suitable for billing applications.

Q- My installation is external or in an exposed area?

A - In this case we would strongly recommend using an enclosure

Q- I can only install the meter in a location that has difficult access

A - A Remote Counter Until can possibly overcome this problem.

Q - I have quite a number of meters that I would like to read remotely

A - Meters UK Ltd manufacture Automatic Meter Reading Systems and they can read all types of utilities, electricity, gas, heat and water.

Q - Are the meters expensive?

A - No Meters UK are a manufacturer . You are dealing direct and not paying a 'middle man'

Q - How can I purchase the meters?

A - Please ring our sales team on 01524 555929/841909 who will be happy to help.
