

ROLE DESCRIPTION

Role title: Software Engineer
Date: 17/10/2016
Incumbent:
Reporting to: Managing Director

Role Outline:

The role of Software Engineer has been established in order to bring in-house the development and maintenance of Meters UK Products by End Users and Consultants.

Key responsibilities will include:

Understanding the technical details of the Company's current products and being able to take over the running, upgrade and maintenance of these systems

Develop both existing and new software platforms for Automatic Meter Reading and Pre-Payment systems.

Work with the Technical Manager to develop software and firmware for new and existing hardware.

Work with Sales and Engineering to specify and develop new platforms.

Providing support for customers with inbound technical queries

In general, the employee will be expected to assist with whatever is deemed to be a priority by the MD or Executive Director.

Utility Meter Manufacturers
ELECTRICITY – GAS – HEAT – WATER METERS

Job Description

To become and stay fully conversant with the technical detail of all Meters UK products

Working with Engineering and external suppliers to:

Understand and be able to take ownership of existing database and automatic meter reading systems

Develop and improve these systems

Interface with customers and partners to develop joint platforms

Provide technical expertise for firmware and software related to hardware development projects

Develop internet based portals and applications to allow customers to interact with Meters UK systems, for example, Pre-payment

Answer inbound technical and sales enquiry calls

Requirements for the role

- Interactive web pages (Javascript, PHP or similar)
- Manipulation of databases using SQL
- Communications using Windows sockets (or similar on Linux)
-
- GUI programming for Windows (C++ or similar)
-
- Strong administration and organisational skills.

This role will be office based in Lancaster

Remuneration is flexible and will reflect the capability and experience of the successful applicant. There is significant scope for both reward and progression.

Most importantly, Meters UK is a small, fast growing company looking for capable, flexible people to help it grow and to assume leadership roles to help manage that growth.
